

CHILD/SEXUAL ABUSE AWARENESS

DID YOU KNOW?

Data from the World Health Organization indicates that nearly three in four children between the ages of two and four regularly suffer physical punishment and/or psychological violence at the hands of parents and caregivers. The WHO also reports that one in five women and one in 13 men report having been sexually abused as a child. Data from the U.S. Department of Health & Human Services indicates that abuse of children under the age of one is especially prevalent, with approximately 94,000 cases of such abuse reported in 2020.
